

Paper Gives Details on U-2 Downing

HAVANA, Nov. 5 (UPD)

The Havana newspaper, *Revolucion*, said today that Cuban antiaircraft batteries shot down United States Air Force Maj. Rudolf Anderson Jr. "while spying over Cuba" in a U-2 plane.

It was the first Cuban admission that Anderson's plane was actually shot down by Cuban weapons. The statement was accompanied by eight photos of the wreckage of the plane, taken "somewhere in the western part of Cuba."

According to *Revolucion*, the official document accompanying Anderson's body said he was "killed on invading the national air space in a U-2 plane in an illegal act violating Cuban sovereignty." The statement was attributed to the Foreign Relations Ministry.

(In Washington, it was announced that Maj. Anderson's body was flown from Havana to Miami yesterday and arrived at Donaldson Air Force Base near Greenville, S. C., today. Burial with full military honors is scheduled on Tuesday in Greenville, Anderson's home town.)
